

About Me

Motivated Data Analysis student with a strong foundation in statistical modeling, machine learning, and data visualization. Experienced in handling large datasets, building predictive models, and extracting meaningful insights to support decision-making. Passionate about improving model performance and applying analytical skills to real-world problems. Additionally, participated in the Boon Rawd Scholarship Camp, where I developed teamwork, collaboration, and communication skills through various student development activities.

Key skills

Data Analysis & Statistical Modeling
Machine Learning
Time Series Analysis (SARIMA)
Data Visualization (Power BI)
Database Design (ER Diagram, Relational Schema)
Programming: R, Minitab

Language

English: good
Thai: native

Address

📍 Ladkrabang, Bangkok, Thailand 50210

AREEYA THONGCHAIYAPHUM

DATA ANALYST

Education

Aug 2022 - Apr 2026

Bachelor of Applied Statistics and Data Analysis

King Mongkut's Institute of Technology Ladkrabang
Solving stockout problem for knee support products using demand forecasting GPA 3.15
Adviser: Dr. Asawin Wongwiwat

Project and Experiences

Machine learning

Prediction of diabetes from 100,000 samples
Analysis factors: blood sugar and glucose level, age, BMI, heart disease status and gender.
Accuracy result: 87.98 percents
Room of improvement: consider model selection to suitable with the data
running paroral model to compare with selected model
consideration confusion metric is resonable base on model philophy

Sales Forecasting

Analyzed and developed sales forecasting models for shampoo products using time series techniques.
Compared Decomposition, Smoothing, and ARIMA models to identify the most suitable model.

Database System Development

Designed and implemented a database system using ER Diagrams and relational schemas
Developed a functional platform for practical data management and usage

Multiple Regression Analysis

Collected and analyzed factors influencing calorie intake
Examined relationships between independent and dependent variables
Applied Box-Cox transformation to improve model assumptions
Selected the most appropriate regression model using R

Other activities

Volunteer Camp

Participated in planning, fundraising, and activity preparation with teammates
Organized recreational activities and sports for students
Learned to communicate with hearing-impaired children through sincerity and patience

Design Thinking Workshop (Gosoft)

Collaborated with students from different universities to explore creative problem-solving approaches. Participated in hands-on activities to understand user needs, brainstorm solutions, and prototype ideas.
